Balancing storage needs with functional space is a challenge. If you're running out of space, or having a hard time accessing all your stuff, high density storage is a great option! High density systems get rid of static aisles by placing shelving and cabinets on carriages that move back and forth on rails in the floor. Simply push a button or turn a handle, and the aisles will move allowing you to easily access all your stuff.

Compact mobile shelving lets you store your stuff in a fraction of your current space. This gives you the opportunity to plan for future growth or use your saved space for something else.

CUSTOM LOCKER STORAGE

Corporate

Spa

The need for custom locker storage is greater now than it has ever been before.

Custom Lockers offer a place to securely store employee belongings, police uniforms and gear, and somewhere to keep sterile supplies clean. They create a way for college students to ensure packages get to them safely, a space for athletes to prepare for game day, and peace of mind for spa goers allowing them to relax knowing their personal items are safe. The uses and possibilities are endless!

We offer a wide range of custom locker solutions with a variety of different locking options to suit your needs. Our Storage Experts will work with you to learn your requirements and design a custom solution for your space.
